

Victim: superb blue wren.

We are investigating the suspected murder of the superb blue wren. Something strange has happened to the water supplied by Sackville North public school sending all students who drink it home sick. However it is unlikely that this is the villain because the superb blue wren rarely drinks from the schools water supply. Earlier today we found a nest of this magnificent bird knocked down from a tree in a mess. Apparently early last year a bird was attacked and killed there were also scratch marks left on the tree. This means there are only two suspects the fox and goanna. There has been fox sightings rapidly on the rise since 1855. A local boy also got chased by a six foot goanna. The evidence strongly supports the case that the fox is the murderer.

Villain: fox
